

## Dynamic Perception D-Pod Multi-function Legs and Micro Tripod

Door andre op wo, 04/03/2013 - 22:31

[1]

Dynamic Perception has announced their long awaited Multi-function Legs and Micro Tripod today. These mini tripods will be available in a few weeks from the writing of this blog. These tripods will be available from [ElysiaVisuals.com](http://ElysiaVisuals.com); your official Dynamic Perception distributor. Please read the official announcement below:

In our quest to create the perfect ultra-light legs for the Stage One, we wanted to make a product that would have more utility, something that wasn't just a single-function device like the Ultra-Light Legs for the Stage Zero. After months of toil designing, making, refining, and crushing prototypes, we finally created something that fit the bill...

Say hello to the D-Pod! Designed primarily for use with the Stage One and Stage Zero, the D-Pod provides three points of connection to the ground for stability when setting up Stage Ones (when attached to the snap-in mid-spans three points are required), but also double as a powerful micro-tripod for normal use as well. The integral 1/4-20 secured mounting stud will let you hook up to most cameras, ballheads, the Stage One slider, and the Stage Zero dolly.

[2]

The D-Pod is truly the David to any other tripod's Goliath. Weighing in at just over 7 ounces each (199 grams), they boast a massive load capacity of up to 150 pounds (68 kilograms) each<sup>1</sup>. Fully-height adjustable between 2.25" (5.7cm) and 3.8" (9.6cm) with each leg able to independently cover the distance swing.

[3]

Need more grip? Each leg features a standard 3/8-16 threaded hole to allow for any standard threaded tripod foot to be attached, from rubber feet to stone-gripping claws. (The legs come with slip-over rubber covers, you'll need to purchase your favorite feet separately.) At release time, we'll also have leg extenders available to give you more height adjustment capabilities.

[4]

We expect to have them ready for retail in approximately four to five weeks, and the final retail price will be \$140.00 each, or a set of two for \$250.00. Each D-Pod comes with our exceptional 1-year warranty. The Euro price will be available soon.

Looking to shed weight on your Stage Zero, go low with your Stage One, or just add a super-duty tabletop tripod to your kit? The D-Pod won't let you down -- well, at least no further than you want to go.
