How to create a Sony SD card for the RamperPro on Windows

Submitted by andre on Tue, 12/08/2015 - 23:32

The Sony A7 series are now supported by the RamperPro. But these cameras are not storing their images to the internal memory card when the camera is connected to a PC/Mac/RamperPro via USB. That is why the RamperPro stores the images on the internal memory card of the RamperPro. But that means that you need a large (micro) SD card inside the RamperPro to hold the images. We described how to do this on a Mac in our online manual [1]. Conrad Olivier has created a video about how to do this on Windows.
